FAMILY IS CALLED

On my 18th birthday I can get tested if I want to see if I have the damaged gene.

If you do have the damaged gene, you will get lots of support to help you. For example, you might have doctors checking up on you more regularly than other people.

QUESTIONS I HAVE

6.	11111			REVI	EVBER
5				1111111111111	
4					
3					
2					
1.	11111				4

Remember, even if you do have the damaged gene, you might not get cancer.
